Introduction

Welcome to **WW3 Shiba**, where every bark counts in the battle against global chaos.

WW3 Shiba is more than just a meme coin; it's a movement aimed at entertaining, engaging, and empowering our community while navigating the perilous waters of **World War 3**. Through immersive games, vibrant community engagement, and a shared passion for memes, we strive to make a difference in the world, one bark at a time.

Mission and Vision

Our mission is to unite a global community through the power of memes and innovative blockchain technology. We aim to create a platform that not only provides entertainment and engagement but also supports charitable causes, particularly those aiding dogs affected by war.

Meet Our Heroes

In our dog-eat-dog world, we've assembled a pack of four fearless champions, each representing a nation's spirit in the face of adversity:

Abe The American Bulldog

Abe is a robust American Bulldog with a muscular build and a patriotic spirit that burns as bright as the stars and stripes. With his iconic jowls and determined gaze, he embodies the values of freedom, democracy, and courage that define the United States of America. Abe stands ready to defend liberty and justice against all threats, leading the charge in the epic struggle against Kim Dog Un and Elon Husk.

Britt, the British Bulldog

Britt is a stout and sturdy British Bulldog with a distinct wrinkled face and a proud demeanor. With a Union Jack bandana tied around his neck, he embodies the resilience and strength of the United Kingdom. His bulldog spirit shines through in his unwavering determination to protect his homeland and allies from the threats of Kim Dog Un and Elon Husk.

Sasha, the Siberian Husky

Sasha is a majestic Siberian Husky with piercing blue eyes and a thick fur coat that glistens like snow in the sunlight. Hailing from the vast landscapes of Russia, she exudes an aura of strength, loyalty, and agility. With her swift movements and keen intelligence, Sasha is a formidable ally in the fight against tyranny and oppression, standing as a guardian of freedom and justice.

Ping, The Pug

Ping is an adorable Pug with a squishy face and a playful personality that belies his inner strength. Despite his small stature, he possesses a big heart and an indomitable spirit, symbolizing the resilience and ingenuity of the Chinese people. Ping's cheerful demeanor and quick wit make him a beloved companion and a valuable asset in the battle to save the world from destruction.

Team Evil

Kim Dog Un, the Tyrant Terrier

Kim Dog Un is a menacing Terrier with a sharp, intimidating glare and an iron-fisted approach to ruling his domain. With a militaristic uniform and a penchant for chaos, he symbolizes tyranny and oppression. His devious plans to wreak havoc on the world are matched only by his cunning intellect, making him a formidable adversary in the quest for global domination.

Elon Husk, the Tech-Savvy Mastiff

Elon Husk is a formidable Mastiff with a sleek, metallic collar and an aura of technological prowess. His piercing eyes are always scanning for ways to outsmart his opponents. As a master of innovation and manipulation, Elon Husk uses his advanced tech gadgets to further his ambitions. His genius mind and ruthless strategies pose a significant threat to the world's peace and stability.

Tokenomics

The **WW3 Shiba** token (WW3S) serves as the backbone of our ecosystem, empowering our community and fueling our mission. With a total supply of 4,300,000 tokens, WW3S operates on the Ethereum network, ensuring fast and secure transactions for our users. At the end of the presale, tokens can be claimed and staked, with listings planned on Uniswap and another centralized exchange post token generation event.

Phase 1: Genesis
